Environmental

Edwards Engineering UK Ltd is a dynamic, independent and expanding service contractor, carrying out the finest quality Machining and Fabrication requirements UK wide.

The Company recognises that its activities impact upon the environment at local, regional and global levels and acknowledges a responsibility for the protection of the environment and of the health and safety of its employees and the wider community.

Edwards Engineering UK Ltd is committed to:

Promoting the protection of the environment and minimising the impact of all its activities upon each of the local, regional and global environments both directly and through its influence on others.

Contributing to a sustainable and healthy future by conserving natural resources and by minimising avoidable waste and pollution.

Reducing the use of fossil fuels through improvements to energy efficiency and the substitution of renewable energy sources.

Avoiding the unnecessary use of hazardous materials and processes.

Developing effective waste management and recycling procedures and using recycled and recyclable materials where possible.

Increasing awareness of environmental responsibilities among staff.

Encouraging initiatives that enhance its environmental performance.

To achieve these goals we will:

Educate and train staff in environmental matters as appropriate.

Progressively reduce the amount of waste generated.

Market products, which create minimum environmental damage and promote production of such products.

Ensure that all public communications are true and unambiguous.

Respect the interests of neighbours and the world community.

Review our policies in an ongoing manner at regular intervals.

Work with suppliers and sub-contractors to improve their environmental performance.

Where appropriate, consult with the local community on environmental issues.

Sustainability

Edwards Engineering UK Ltd is committed to providing world-class sustainable solutions. We listen to our client's requirements and think about how our solutions meet today's demands whilst always considering the future.

From overall supply chain solutions, project management services, plant maintenance and precision value engineering, Edwards Engineering UK Ltd works closely with our customers and consultants to enhance the overall performance and provide demonstrable cost certainty, whilst increasing the life span of the essential equipment our customers rely on.

We are committed to making sure that our ideas, combined with our customers', mature into sustainable solutions that save money.

We are committed to minimising the impact our operations can have on the local environment whilst providing maximum protection to our employees, customers and the public.

We believe in delivering the difference to our customers and this is why we look beyond every client's baseline requirements to provide a complete service, including:

Full Turn Key Solutions

On-site or off- site fabrication services.

All aspects of work carried out in house including, strip out of plant / process equipment, refurbishment and re-installation including testing and commissioning in real-time to provide fault free installations getting it right first time.

Ongoing implementation of our environmental management culture, which is based on the principle of achieving and reporting continuous improvement in environmental performance.

Edwards Engineering UK Ltd believes that working together as a team, in partnership with our customers provides the best opportunities to understand the real requirements and return sustainability.
